

Company Profile: Endurance Wind Power Inc. is a manufacturer and supplier of a complete line of small to mid-sized, grid-connected wind turbines. Endurance Wind Power was founded on the strong belief that our planet needs affordable, long lasting and sustainable clean energy. Our customers, who include homes, farms, schools, businesses and even municipalities, can produce their own power cost-effectively, leading the way for the new generation of clean energy.

Our Surrey based team is among the most talented in the industry and is positioned for growth in this exciting industry. You too could be a part of our success.

Job Title: R&D Project Manager

Location: South Surrey, BC

Salary: Negotiable depending on experience

Duties:

- Managing multi-disciplined project teams towards successful project completion within the constraints of scope, time, cost and quality.
- Implementing a new Project Management system based on the PMI Body of Knowledge.
- Ongoing project portfolio management – overseeing and reporting progress of all engineering projects to the Technical Director.

Required Qualifications:

- Bachelor of Applied Science or Engineering (electrical or mechanical disciplines preferred)
- 3+ years of engineering experience.
- 2+ years of experience leading successful R&D projects.
- Excellent verbal and written communications skills.
- Extremely organized with meticulous attention to detail.
- Ability to prioritize and multi-task.
- Valid passport with no travel restrictions.

Desirable Qualifications:

- A strong preference will be given to candidates holding a PMP (Project Management Professional) designation from the Project Management Institute.
- Experience in the wind industry (or other renewable energy industry).
- Experience in the automotive industry.
- Experience in project management within an ISO certified company.
- Experience in managing projects that use a CMMI certified solution delivery life cycle (SDLC).

Application Procedure:

- Due to the large number of expected applicants, a brief application form has been provided to summarize your application into one cover page. Please attach a cover letter and resume after the application form and place all three items in one pdf file if possible.
- Successful candidates will be selected for a preliminary 15min meet and greet style round one interview.
- Successful candidates from the round 1 interviews will be selected for a second interview for approximately 90min.
- Successful candidates from round 2 will meet the entire R&D team and several senior executives before the hiring committee makes a final decision.

Application Form:

Please place a completed version of this application form alone on page 1 of your application.
